

SADIQUL ISLAM SHAKIB

Final-year Computer Science and Engineering undergraduate with hands-on experience in full-stack web development.

Proficient in JavaScript, React.js, Next.js, Node.js, Express, and MongoDB. Experienced in building real-time applications using Socket.IO and WebRTC.

Strong understanding of database design, system architecture, and scalable application development.

Demonstrated ability to learn quick

Work Experience

Full-Stack Developer (Self Projects)

- Built multiple full-stack applications using React.js, Next.js, Node.js, and MongoDB
- Developed real-time features (chat, video conferencing) using Socket.IO and WebRTC
- Improved code quality, folder structure, and architecture across projects
- Focused on solving real-world problems through practical applications

Projects

BD TravelSpirit

July 2025 - Present

- Built a scalable full-stack travel support platform featuring tour management, real-time chat, ML-powered user analytics, and role-based access control (5 user roles); designed efficient MongoDB schemas and implemented Cloudinary-based media storage for optimized performance.
- Engineered production-grade backend architecture with centralized error handling and MongoDB transactions for atomic operations; developed high-performance REST APIs using offset & cursor-based pagination and managed end-to-end workflows across all user roles.

NextLearn

Aug 2025 - Nov 2025

- Built a modern Next.js application demonstrating core concepts like dynamic routing, component-based architecture, and optimized data fetching; structured the project following scalable folder conventions and best practices for maintainable frontend development.
- Implemented server/client rendering patterns, reusable UI components, and SEO-friendly architecture, gaining hands-on experience with real-world Next.js features such as API routes, performance optimization, and production-ready project structure.

MeetingSync

April 2025 - July 2025

- Developed a real-time meeting scheduling and collaboration platform with Socket.IO-based live updates; implemented a conflict-detection algorithm to prevent overlapping bookings and optimized database queries to ensure consistent performance under concurrent user interactions.

Skills

Frontend

- HTML, CSS, JavaScript, React.js, Next.js, Traiwindcss, ShadcnUI

Backend

- Node.js, Express.js, Axios

Database

- MongoDB, Mongoose & Sql

Tools/Software

- Postman
- Thunder Client
- Git
- Github

Languages

- English (Intermediate)
- Bangla (Fluent)
- Hindi (Intermediate)

Education

Bachelor of Computer Science

North Eash University Bangladesh

July 2022 - July 2026

Higher Secondary School Certificate

Universal Collage Sylhet

Aug 2019 - Aug 2021
